内容概要

Transfer Access data seamlessly between Microsoft Office applications—and that's just for starters! In this all-new, comprehensive guide by well-known Access expert Helen Feddema, you'll learn to write Visual Basic® code that automates Access database tasks, creates standalone scripts, extracts and merges data, and allows you to put together powerful solutions that increase your efficiency across the Office family. Whether you're a beginner or a power user, this is the book you need to succeed with Access 2007. 作者简介： Helen Feddema is one of the most highly respected experts on Microsoft Access. She is the author of several leading books on Microsoft Access, including the bestselling Microsoft Access Version 2002 Inside Out and Expert One-on-One Microsoft Access Application Development. She is the editor of Access Watch, for which she writes the Access Archon column. She is also an independent Access consultant.
