<<直肠癌的现代治疗 Modern M>>

内容概要

addresses such topics as epidemiology, biology, screening and chemoprevention, the role of imaging in diagnosis, staging and prognosis, radiation therapy, medical and surgical treatment, as well as new modalities of therapy, including laparoscopy, and transanal endoscopic surgery. A greater understanding of prognostic factors, patterns of spread and natural history has occurred during the past decade; together with new diagnostic modalities this has led to significant changes in the management of patients with rectal cancer. This book will be invaluable for all those who treat rectal cancer.

<<直肠癌的现代治疗 Modern M>>

书籍目录

List of Contributors
 Introduction
 1 Evolution of the Surgical Management of Rectal Cancer Introduction Perineal Approach Transanal Excision Transsacral Resection Abdominosacral Resection Abdominoperineal Resection Abdominoanal Approach Anterior Resection The Present References
 2 Pathology and Staging Introduction Resection Specimen Total Mesorectal Excision Histological Features of Rectal Cancer and Their Prognostic Significance Histological Type Tumour Differentiation Invasive Growth Pattern and Peritumoral Lymphocytic Infiltration Completeness of Excision Serosal Involvement Lymph Node Metastases Extramural Vascular Invasion Surgical Resection Margins and Local Recurrence Local Recurrence Longitudinal Resection Margin Circumferential Resection Margin Staging of Rectal Cancer Staging Systems Currently in Existence Dukes Staging TNM Staging System Dukes Staging Versus TNM Role of Pathology in Assessing the Quality of Rectal Cancer Surgery Quality of Preoperative Imaging and Pathology Reporting, and the Use of Reporting Proformas Conclusions References
 3 Genetics, Screening and Chemoprevention Introduction Genetics Tumor Suppressor Genes MMR Genes Oncogenes Screening Average Risk Moderate Risk Increased Risk Chemoprevention NSAIDs Calcium Antioxidant Vitamins Circumin Perillyl Alcohol Oltipraz Selenium References
 4 The Role of Imaging in the Diagnosis and Staging of Primary and Recurrent Rectal Cancer Introduction I Diagnostic Imaging in the Staging of Primary Rectal Cancer I Clinical Evaluation Contrast Examinations Endorectal Ultrasound Computed Tomography Magnetic Resonance Imaging Positron Emission Tomography Radioimmunoscinigraphy Diagnostic Imaging in the Diagnosis and Staging of Recurrent Rectal Cancer Ultrasound Techniques Computed Tomography Magnetic Resonance Imaging Positron Emission Tomography and Immunoscinigraphy Conclusions References
 5 Neoadjuvant Therapy Introduction Preoperative Therapy Rationale Predictors of Response to Preoperative Therapy Results of Preoperative Therapy Intensive Short Course Preoperative Radiation Sphincter Preservation with Preoperative Radiation Is Adjuvant Therapy Necessary in Patients Undergoing a Total Mesorectal Resection
 7 Investigational Approaches Altered Radiation Fractionation Schemes New Chemotherapeutic Agents
 6 Restorative Procedures
 7 Abdominoperineal Resection
 8 Total Mesorectal Excision with Autonomic Nerve Preservation: "Optimized Surgery"
 9 Laparoscopic Resections for Large Bowel malignancy
 10 Minimal Access Surgery for Rectal Cancer
 11 Postoperative Adjuvant Combined Modality Therapy
 12 Follow-up After Potentially Curative Therapy for Rectal Cancer
 13 Surgical Approach to Locally Recurrent Disease
 14 Metastatic Rectal Cancer
 15 Rare Histotypes
 16 Quality of Life and Palliative Care in Rectal Cancer Patients
 17 Costs of Rectal Cancer Patient Management
