## 内容概要

This book constitutes the thoroughly refereed post-proceedings of the two International Workshops on Agent Communication, AC 2005 and AC 2006, held in Utrecht, Netherlands in July 2005, and in Hakodate, Japan in May 2006 as associated events of AAMAS 2005/2006, the main international conference on autonomous agents and multi-agent systems. The 20 revised full papers presented were carefully reviewed and selected - they represent the best papers from the Agent Communication workshops of 2005 and 2006, enriched with a few revised agent communication papers from the AAMAS conference. The papers are organized in topical sections on semantics of agent communication, commitments in agent communication, protocols and strategies, as well as reliability and overhearing.

书籍目录

Section I Semantics of Agent Communication An Operational Model for the FIPA-ACL Semantics Temporal Logics for Representing Agent Communication Protocols ACL Semantics Between Social Commitments and Mental Attitudes On the Semantics of Conditional CommitmentSection II : Commitments in Agent Communication A Commitment-Based Communicative Act Library Integrating Social Commitment-Based Communication in Cognitive Agent Modeling Flexible Conversations Using Social Commitments and a Performatives Hierarchy Using Social Commitments to Control the Agents~ Freedom of Speech ...
