<<中学英语阶梯阅读4>>

内容概要

《中学英语阶梯阅读》系列丛书引进并改编自Success with Reading英文原版，是包含四个级别的进阶式英语阅读教程。每本教程包含题材广泛、风格各异的近百篇阅读文章，配以精美图片，并附有实用的练习题。阅读材料全部取自原汁原味的英语文章，内容涵盖文化、艺术、生物、科技、历史、地理等多个方面，让学生在享受阅读乐趣的同时，增长百科知识，提高英语能力。

本书编者云集国内知名院校的骨干英语教师，对全部语篇进行精心改编——标注语篇中出现的《英语课程标准》重点词，帮助学生学习；对语篇的文化背景知识加注，帮助学生更好地理解语篇内容；对超出《英语课程标准》范围的生词、难词标注中文词义，便于学生不间断地阅读。

章节摘录

Mercury is one of the first metals to be discovered by humans; the earliest known use dates to the pyramids of Egypt, about 1500 years BCE. Much mysticism and erroneous assumptions have surrounded it throughout the centuries, probably due to the fact that it is liquid at room temperature. In 210 BCE, the Chinese emperor Qin Shi Huang died from ingesting a mercury-laden concoction that was intended to make him immortal. The forebears of modern chemistry, the alchemists, believed that mercury was the common base of all metals and that one could make any metal by adding other substances to it. Mercury was even used, unsuccessfully, to treat syphilis for at least 400 years.
