

<<Java程序设计语言>>

图书基本信息

书名：<<Java程序设计语言>>

13位ISBN编号：9787115147622

10位ISBN编号：7115147620

出版时间：2006-5

出版时间：人民邮电出版社

作者：（美）阿诺德，（美）高斯林，（美）霍姆斯 著

页数：891

字数：1100000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<Java程序设计语言>>

内容概要

本书主要讲授Java程序设计语言，系统地介绍Java的主要包(即java.lang.*、java.util和java.io)中的大多数类，并以内容丰富的示例对这些类如何工作进行了深入剖析。

作者对这部经典著作进行更新，使其反映了Java 2标准版5.0(J2SE 5.0)中主要的增强。

本版中增加了几章新内容，专门讨论泛型、枚举以及注解(这些是5.0版引入的主要的新特性)，并且加了几小节论述断言和正则表达式。

本书经过更新后还结合了当今构建健壮、高效和可维护的Java软件的最佳实践。

本书对所有程序员(包括那些经验丰富的程序员在内)都是不可或缺的参考书。

<<Java程序设计语言>>

书籍目录

Contents1 A Quick Tour 11.1 Getting Started 11.2 Variables 31.3 Comments in Code 61.4
 Named Constants 71.5 Unicode Characters 81.6 Flow of Control 91.7 Classes and Objects 121.7.1
 Creating Objects 131.7.2 Static or Class Fields 141.7.3 The Garbage Collector 151.8 Methods and
 Parameters 151.8.1 Invoking a Method 151.8.2 The this Reference 171.8.3 Static or Class Methods
 171.9 Arrays 181.10 String Objects 211.10.1 String Conversion and Formatting 231.11 Extending a
 Class 241.11.1 Invoking Methods of the Superclass 251.11.2 The Object Class 26 1.11.3 Type Casting
 271.12 Interfaces 271.13 Generic Types 291.14 Exceptions 321.15 Annotations 351.16
 Packages 361.17 The Java Platform 381.18 Other Topics Briefly Noted 392 Classes and Objects
 412.1 A Simple Class 422.1.1 Class Members 42 2.1.2 Class Modifiers 432.2 Fields 442.2.1
 Field Initialization 442.2.2 Static Fields 452.2.3 final Fields 462.3 Access Control 472.4 Creating
 Objects 492.5 Construction and Initialization 502.5.1 Constructors 502.5.2 Initialization Blocks
 542.5.3 Static Initialization 552.6 Methods 562.6.1 Static Methods 582.6.2 Method Invocations
 582.6.3 Methods with Variable Numbers of Arguments 602.6.4 Method Execution and Return 622.6.5
 Parameter Values 632.6.6 Using Methods to Control Access 652.7 this 682.8 Overloading Methods
 692.9 Importing Static Member Names 712.10 The main Method 732.11 Native Methods 743
 Extending Classes 753.1 An Extended, Class 763.2 Constructors in Extended Classes 803.2.1
 Constructor Order Dependencies 813.3 Inheriting and Redefining Members 843.3.1 Overriding
 843.3.2 Hiding Fields 863.3.3 Accessing Inherited Members 863.3.4 Accessibility and Overriding
 883.3.5 Hiding Static Members 893.3.6 The super Keyword 893.4 Type Compatibility and Conversion
 903.4.1 Compatibility 903.4.2 Explicit Type Casting 913.4.3 Testing for Type 923.5 What
 protected Really Means 933.6 Marking Methods and Classes final 963.7 Abstract Classes and Methods
 973.8 The Object Class 993.9 Cloning Objects 1013.9.1 Strategies for Cloning 1013.9.2 Correct
 Cloning 1013.9.3 Shallow Versus Deep Cloning 1063.10 Extending Classes: How and When 1073.11
 Designing a Class to Be Extended 1083.11.1 Designing a Class to Be Extended 1083.12 Single
 Inheritance versus Multiple Inheritance 1144 Interfaces 1174.1 A Simple Interface Example 1184.2
 Interface Declarations 1204.2.1 Interface Constants 1214.2.2 Interface Methods 1224.2.3 Interface
 Modifiers 1224.3 Extending Interfaces 1224.3.1 Inheriting and Hiding Constants 1234.3.2 Inheriting,
 Overriding, and Overloading Methods 1254.4 Working with Interfaces 1264.4.1 Implementing Interfaces
 1274.4.2 Using an Implementation 1294.5 Marker Interfaces 1304.6 When to Use Interfaces 1315
 Nested Classes and Interfaces 1335.1 Static Nested Types 1335.1.1 Static Nested Types 1345.1.2
 Nested Interfaces 1355.2 Inner Classes 1365.2.1 Accessing Enclosing Objects 1385.2.2 Extending
 Inner Classes 1395.2.3 Inheritance, Scoping, and Hiding 1405.3 Local Inner Classes 1425.3.1 Inner
 Classes in Static Contexts 1445.4 Anonymous Inner Classes 1445.5 Inheriting Nested Types 1465.6
 Nesting in Interfaces 1485.6.1 Modifiable Variables in Interfaces 1495.7 Implementation of Nested
 Types 1496 Enumeration Types 1516.1 A Simple Enum Example 1516.2 Enum Declarations
 1526.2.1 Enum Modifiers 1546.3 Enum Constant Declarations 1546.3.1 Construction 1556.3.2
 Constant Specific Behavior 1566.4 java.lang.Enum 1596.5 To Enum or Not 1607 Tokens, Values,
 and Variables 1617.1 Lexical Elements 1617.1.1 Character Set 1617.1.2 Comments 1637.1.3
 Tokens 1647 1.4 Identifiers 1647.1.5 Keywords 1657.2 Types and Literals 1667.1.1 Reference
 Literals 1677.2.2 Boolean Literals 1677 2.3 Character Literals 1677 2.4 Integer Literals 1677 2.5
 Floating-Point Literals 1687.2.6 String Literals 1687.2.7 Class Literals 1697 3 Variables 1697.3.1
 Field and Local Variable Declarations 1707.3.2 Parameter Variables 1717.3.3 final Variables 1717.4
 Array Variables 1737.4.1 Array Modifiers 1747.4.2 Arrays of Arrays 1747 4.3 Array Initialization
 1757.4.4 Arrays and Types 1777.5 The Meanings of Names 1788 Primitives as Types 1838.1
 Common Fields and Methods 1848.1.1 Construction 1858.1.2 Constants 1858.1.3 Common

<<Java程序设计语言>>
