

<<Selenoproteins and M>>

图书基本信息

书名：<<Selenoproteins and Mimics硒蛋白及其模拟物>>

13位ISBN编号：9787308082730

10位ISBN编号：7308082733

出版时间：2011-6

出版时间：浙江大学出版社

作者：刘俊秋，罗贵民，牟颖 主编

页数：330

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<Selenoproteins and M>>

### 内容概要

Junqiu Liu · Guimin Luo · Ying

Mu编写的《硒蛋白及其模拟物(英文版)(精)》是一本交叉学科的专著，邀请了国内外硒蛋白领域多位知名教授合作编写，将着重介绍各种硒蛋白的研究现状，特别是对近年来硒酶模拟化学和生物学相关研究进展进行全面综述。

## <<Selenoproteins and M>>

### 作者简介

刘俊秋 , is a professor at the State Key Lab of Supramolecular Structure and Materials, Jilin University, China. Guimin Luo is a professor at the Key Lab of Molecular Enzymology and Engi-neering of the Ministry of Education, lilin University, China.牟颖 , is a professor at the State Key Lab of Industrial Control Technology, Zhejiang University, and guest professor at the Key Lab of Molecular Enzymology and Engineering of the Ministry of Education, Jilin University, China.

## <<Selenoproteins and M>>

### 书籍目录

- 1 Glutathione Peroxidases
  - 2 Thyroid Hormone Deiodinases
  - 3 Thioredoxin Reductase
  - 4 Selenophosphate Synthetase
  - 5 Selenoprotein P
  - 6 Selenoprotein T
  - 7 Selenoprotein W
  - 8 Selenoprotein Biosynthesis
  - 9 Bioinformatics of Selenoproteins
  - 10 Selenoproteins and Atherosclerosis
  - 11 Selenoproteins and Brain Diseases
  - 12 Selenoproteins and Thyroid Cancer
  - 13 Selenoproteins and Selenium Speciation in Food
  - 14 Synthetic Mimics of Selenoproteins
  - 15 Cyclodextrin-based Mimics of Selenoproteins
  - 16 Semisynthesized Selenoproteins
  - 17 Selenium-containing Catalytic Antibodies
  - 18 Biosynthetic Mimics of Selenoproteins
  - 19 Nanoenzymes as Selenoprotein Mimics
  - 20 Selenoprotein Mimics and Diseases
- Index

## <<Selenoproteins and M>>

### 章节摘录

版权页：插图：A role for THs in female reproduction has been suggested for a number of years. Enigmatically, iodine appears to concentrate in the ovary second only to the thyroid. This uptake varies with sexual activities and is enhanced by estrogens and a hypothyroid state and blocked by goitrogens. The physiological significance of ovarian iodine-uptake is yet to be elucidated. Recently, Slebodzinski [73] showed the presence of deiodinase activity capable of generating T3 in the follicular fluid within the ovary of several mammals, suggesting that T3 may be important for oocyte-maturation. Although the testis was long thought to be TH-unresponsive, the D2 enzyme has now been shown to be active in rat testis, where it is concentrated in the spermatids, again suggesting a role for T3 in gamete maturation [74]. Moreover, Anguiano et al.
