综合类B级专家命题预测试卷一

综合类B级专家命题预测试卷二

综合类B级专家命题预测试卷三

综合类B级专家命题预测试卷四

综合类B级专家命题预测试卷五

综合类B级专家命题预测试卷六

参考答案及解析

综合类B级专家命题预测试卷一

综合类B级专家命题预测试卷二

综合类B级专家命题预测试卷三

综合类B级专家命题预测试卷四

综合类B级专家命题预测试卷五

综合类B级专家命题预测试卷六

章节摘录

Millions of people are using cell phones today. In many places it is actually considered unusual not to use one. In many countries, cell phones are very popular with young people. They find that the phones are more than a means of communication—having a mobile phone shows that they are cool and connected. The explosions around the world in mobile phone use make some health professionals worried. Some doctors are concerned that in the future many people may suffer health problems from the use of mobile phones. In England, there has been a serious debate about this issue. Mobile phone companies are worried about the negative publicity of such ideas. They say that there is no proof that mobile phones are bad for your health. On the other hand, why do some medical studies show changes in the brain cells of some people who use mobile phones? Signs of change in the tissues of the brain and head can be detected with modern scanning (扫描) equipment. In one case, a traveling salesman had to retire at a young age because of serious memory loss. He couldn't remember even simple tasks. He would often forget the name of his own son. This man used to talk on his mobile phone for about six hours a day, every day of his working week, for a couple of years. His family doctor blamed his mobile phone use, but his employer's doctor didn't agree. What is it that makes mobile phones potentially harmful? The answer is radiation. High-tech machines can detect very small amounts of radiation from mobile phones. Mobile phone companies agree that there is some radiation, but they say the amount is too small to worry about. As the discussion about their safety continues, it appears that it's best to use mobile phones less often. Use your regular phone if you want to talk for a long time. Use your mobile phone only when you really need it. Mobile phones can be very useful and convenient, especially in emergencies. In the future, mobile phones may have a warning label that says they are bad for your health. So for now, it's wise not to use your mobile phone too often.

31. People buy cell phones for the following reasons EXCEPT that_____. A. they're popular B. they're cheap C. they're useful D. they're convenient

32. The word "detected" in paragraph 3 could be best replaced by_____. A. cured B. removed C. discovered D. caused

33. The salesman retired young because_____. A. he disliked using mobile phones B. he couldn't remember simple tasks C. he was tired of talking on his mobile phone D. his employer's doctor persuaded him to

34. On the safety issue of mobile phones, the manufacturing companies_____. A. deny the existence of mobile phone radiation B. develop new technology to reduce mobile phone radiation C. try to prove that mobile phones are not harmful to health D. hold that the amount of radiation is too small to worry about

35. The writer's purpose of writing this article is to advise people_____. A. to use mobile phones less often B. to buy mobile phones C. to update regular phones D. to stop using mobile phones

第二篇 Excessive Demands on Young People Being able to multitask is hailed by most people as a welcome skill, but not according to a recent study which claims that young people between the ages of eight and eighteen of the so-called Generation M are spending a considerable amount of their time in fruitless efforts as they multitask. It argues that, in fact, these young people are frittering (浪费) away as much as half of their time as they would if they performed the very same tasks one after the other.
