内容概要

曹素贞主编的《医学英语文献阅读(2)》共12单元, 每个单元包括Text A, Text B和Medical Vocabulary Workshop三部分。

Text

A以医学学术文献(EAP)为主, 文章全部摘自医学类经典教材或权威杂志、网站, 如Harrison内科学, New England

Journal of Medicine, the Lancet等, 覆盖了医科目前最有代表性的各分支研究。

Text

B以医学职业/临床文献(EOP)为主, 包括医疗实践中最常用的各类文书以及临床科研中最需要的标书申请和会议交流。

Medical

Vocabulary

Workshop则是针对广大医科师生在医学英语教学中的最大困难——医学专业词汇而编写, 有目的地突出了其中构词的特点归类 and 发音以便于学习记忆。

各单元的三部分后面都附有练习, 包括阅读理解、讨论拓展、词汇运用、段落翻译等。

为便于自学和查阅, 精读的Text

A课文都提供了详细的注释, 书后附有词汇表、练习参考答案、以及其他补充拓展的辅助资料。

泛读的Text

B临床文书前也有简洁的语篇介绍和导读。

本书适合于大学英语提高阶段的教学使用, 可供医学专业高年级、七年制、八年制和硕士研究生等医科学生作为课程用书, 也可供广大医学工作者在临床和教学中作为参考书使用。

章节摘录

Text A Hippocratic Oath, The Medical Ideal Perhaps the most enduring-certainly the most quoted-tradition in the history of medicine is the Hippocratic Oath. Named after the famous Greek physician Hippocrates', this oath was written as a guideline for the medical ethics of doctors. Although the exact words have changed over time, the general content is the same-an oath to respect those who have imparted their knowledge upon the science of medicine and respect to the patients as well as the promise to treat them to the best of the physicians' ability. Who Was Hippocrates, and Did He Write the Oath ?

For a man considered by many to be the " Father of Medicine ", little is known about Hippocrates of Cos. He lived circa 460-380 BC, and was the contemporary of Socrates as well as a practicing physician. He was certainly held to be the most famous physician and teacher of medicine in his time. Over 60 treatises of medicine, called the Hippocratic Corpus, have been attributed to him ; however, these treatises had conflicting contents and were written sometime between 510 and 300 BC, and therefore could not all have been written by him. The Oath was named after Hippocrates, certainly, although its penmanship is still in question. According to authorities in medical history, the contents of the oath suggest that it was penned during the 4th Century BC, which makes it possible that Hippocrates had himself written it. Anyway, regardless of whether or not Hippocrates himself had written the Hippocratic Oath, the contents of the oath reflect his views on medical ethics. From Medical Ideal to Standard Ethics Guidelines The Hippocratic Oath was not very well received when it was first penned, being a representation of only a minor segment of Greek opinion at the time. However, by the end of ancient times, physicians began conforming to the conditions of the oath. It is possible that when scientific medicine suffered a gross decline after the fall of the Roman Empire, this oath, along with the dictates of Hippocratic medicine, was all but forgotten in the West. It was through the perseverance of the spirit of inquiry in the East that the tenets of Hippocratic medicine-and the Hippocratic Oath-survived this period of deterioration, notably through the writings of Arabian authorities in medicine. The knowledge of Greek medicine was later revived in the Christian West through the Latin translations of both these Arabic works and the original Greek texts. By the late 17th Century, standards of professional behavior had been set in the Western World. The first code of medical ethics to be adopted by a professional organization was written by English physician Thomas Percival (1740-1804) in 1794, which was adapted and adopted by the American Medical Association (AMA) in 1846. This code of ethics, which provided a gold standard for professional physicians, dictated the moral authority and independence of physicians in service to others and their responsibility towards the sick, as well as the physician's individual honour. The seeds had been sown by Hippocrates-or one of his ghost writers.
