<<新课标英语导学与拓展>>

内容概要

《新课标英语导学与拓展》是“控江中学新教材二次开发丛书”之一，汇集了控江中学资深英语教师多年的教学经验，为高三学生第一学期第一轮复习提供了非常系统、有效、实用的教辅资料。

《新课标英语导学与拓展》的亮点在于信息量大，题型全而新，分为七个篇章：课文篇、语法篇、词汇完型篇、阅读篇、翻译篇、写作篇和高考模拟试卷篇。

由于英语教材多样化，因此在《新课标英语导学与拓展》编排中不仅涵盖了《Oxford English》和

《New Century Senior English》两种教材的高三的课本内容，同时以英语专项训练的题型出现，旨在面向所有上海市英语高考的学生，也可作为英语教师备课首选。

章节摘录

One hundred years ago in Germany, there was a scientist named Wilhelm Konrad Roentgen. He was very devoted to his research and worked in his laboratory day and night. His wife was concerned about his health and really wished that he could spend more time with his family. Eventually on December 22, 1895, Roentgen was able to ease his wife's concerns. He took her downstairs to his laboratory to show her what was taking so much of his time and attention. He asked that she place her hand on a photographic plate and keep her eyes closed. Then, he switched on the machine, and it hummed with the flow of electricity. Finally, he removed the plate to develop it. When he returned with the developed photo, she was astonished. There, before her eyes, were the very bones of her fingers and wrist. And on her third finger was a bright white image of her wedding ring. Roentgen carefully dated the photograph December 22, 1895 — the birth of the era of X-rays. The world did not learn about it for another month, when Roentgen's paper was published. It was a great surprise to scientific circles and a significant contribution to the world. When the Nobel Prizes were established in 1901, Roentgen was the first to receive the prize for physics.
