Chapter 6 Media Focus Reading 1 Why We Crave Horror Movies Focus Reading 2 Blowing the Lid off the ID Related Reading 1 The Nightmare World Related Reading 2 Horror Films 参考答案

章节摘录

The law of succession considers how property is passed along from one generation to another. The American legal system recognizes a persons right to dispose of his or her property as he or she wishes. One common way to do this is to execute a will. If a person leaves behind a valid will , the courts will enforce it. However , if someone leaves no will ( or has improperly drawn it up ) , then the person has died intestate , and the state must dispose of the property. The states disposition of the property is carried out according to the fixed schemes set forth in the state statutes. By law , intestate property passes to the deceased persons heirs—that is , to his or her nearest relatives. Occasionally a person who dies intestate has no living relatives. In that situation the property escheats , or passes , to the state in which the deceased resided. State statutes often prohibit the more remote relatives , such as second cousins and great uncles and aunts , from inheriting.
