<<Miller麻醉学两卷套>>

内容概要

Brings techniques to life with full-color video demonstrations on the CD-ROM. Presents each chapter as a self-contained, mini monograph on its topic. Uses a two-color design that makes reference easy. Offers full-color sections on regional anesthesia techniques and transesophageal echocardiography. Includes extensive references. Provides an Appendix with ASA guidelines. Available as a two-volume set...as a dynamic, fully searchable, continuously updated web site...or as a breakthrough e-dition book/web access package.

Presents completely revised and thoroughly updated coverage throughout. Offers fresh new perspectives and insights from new author teams for more than 20% of the chapters. Features brand-new new chapters that address today's hottest topics including Implantable Cardiac Pulse Generator · Civil, Chemical and Biological Warfare · Anesthesia for Robotic Surgery · Perioperative Blindness · Human Performance and Patient Safety · and many more. Includes new video segments on key techniques on the CD-ROM, such as Fastrach Intubation · Thoracic Epidural · Tracheostomy · Pediatric Lines · and Nerve Block Using Ultrasound.
